If now it be asked, what are the intended objects of our inquiries within these spacious limits, we answer, *MAN* and *NATURE*; whatever is performed by the one, or produced by the other.

Sir William Jones

236 Years of Publications

It will flourish, if naturalists, chemists, antiquaries, philologists and men of science, in different parts of Asia, will commit their observations to writing, and send them to the Asiatic Society at Calcutta; it will languish, if such communications shall be long intermitted; and it will die away, if they shall entirely cease.
